## SWNG Swing Sampler

Handheld Sampler for Horizontal Flows

### Features

- Hinged end for easy sample collection
- Pole extends up to 12 feet

### Description

The SWNG Swing Sampler is specifically designed for applications involving the collection of a sample from a horizontal flowing stream of water, such as a sewer, river, or other channel. The end of the sampler swings, allowing collection from different angles up to 90°. The SWNG includes a 6 ft (1.83 m) fiberglass pole that extends up to 12 ft, providing an adequate reach for most sampling situations. A 960 ml polyethylene bottle included with the sampler has a cover with a vinyl liner for leak-proof protection. The bottle is attached to a polyurethane holder and is held in place with a plastic snapper ring that has an adjustable locking device. Other types of bottles may be used, but a different type of fastener may be required to hold the bottle in place. Accessories include 12 packs of either 500 ml or 950 ml HDPE bottles, and additional snapper attaching rings.
