

EP180 Evaporation Pan

Stainless Steel Class A Evaporation Pan with Drain Plug and Stilling Well

Description

Global Water's EP180 Evaporation Pan is a rugged stainless steel pan for measuring daily evaporation. The EP180 is built to be compatible with all standard National Weather Service evaporation pan measurements: it is 10" deep and has an inside diameter of 47½". It is a Class A pan that features a drain plug and an attached stilling well. The EP180's stilling well supports easy installation of a low-range water level sensor, such as Global Water's 3' WL400 or 3' WL16.

Global Water offers a range of water level sensors, water temperature sensors, weather sensors, and datalogging capabilities to complete your evaporation monitoring system (see the Ordering & Options section).

Features

- Rugged stainless steel pan
- Compatible with standard National Weather Service measurements
- Use with our sensors and dataloggers to establish a complete monitoring system

Applications

Ideal for daily evaporation monitoring, water spills, tank failures, pump failures, rising water, floods, and more.

Specifications

Construction	Low carbon stainless steel passivated after welding, heliarc welded
Size	47.5" dia. x 10" deep (121 cm dia. x 24 cm deep)
Weight	48 lbs (22 kg)

Ordering & Options

Evaporation Pan*

Order No.	Description
EP180	Evaporation Pan

* Price does not include motor freight shipping charges. Please call Global Water for additional information.

Accessories

Order No.	Description
WL400-003-025	Water Level Sensor (3' range, 25' cable)
WL16U-003-025	USB Water Level Logger (3' range)
WL16S-003-025	Serial Water Level Logger (3' range)
RG200	Tipping Bucket Rain Gauge, 6"
RG600	Tipping Bucket Rain Gauge, 8"
GL500-7-2	9 Channel Global Logger
GL500U-2-1	3 Channel USB Global Logger
GL500S-2-1	3 Channel Serial Global Logger
WE800	Datalogging Weather Station
WE900	4-20 mA Weather Station
