### APPLICATIONS

		
Force Measurement	Suspended Hoppers	Overhead Track Scales

### DESCRIPTION

The models 363 and 9363 are true multipurpose load cells which can be used in tension and compression. The 363 is made of nickel plated alloy steel, while the 9363 is made of stainless steel.

Both product is suitable for a wide range of hybrid scales, overhead track scales, belt scales and process weighing applications.

Reliable sealing is ensured by the proprietary TRANSEAL potting compound and additional mechanical protection of the strain gauge area.

### FEATURES

- Nickel plated (363) and stainless steel (9363) versions
- Certified to OIML R60, 3000d and NTEP IIIIL, 10000 divisions
- Suitable for compression and tension applications
- Trimmed output as standard
- Capacities: **50 → 10000 kg**
